Customer booking in your brand

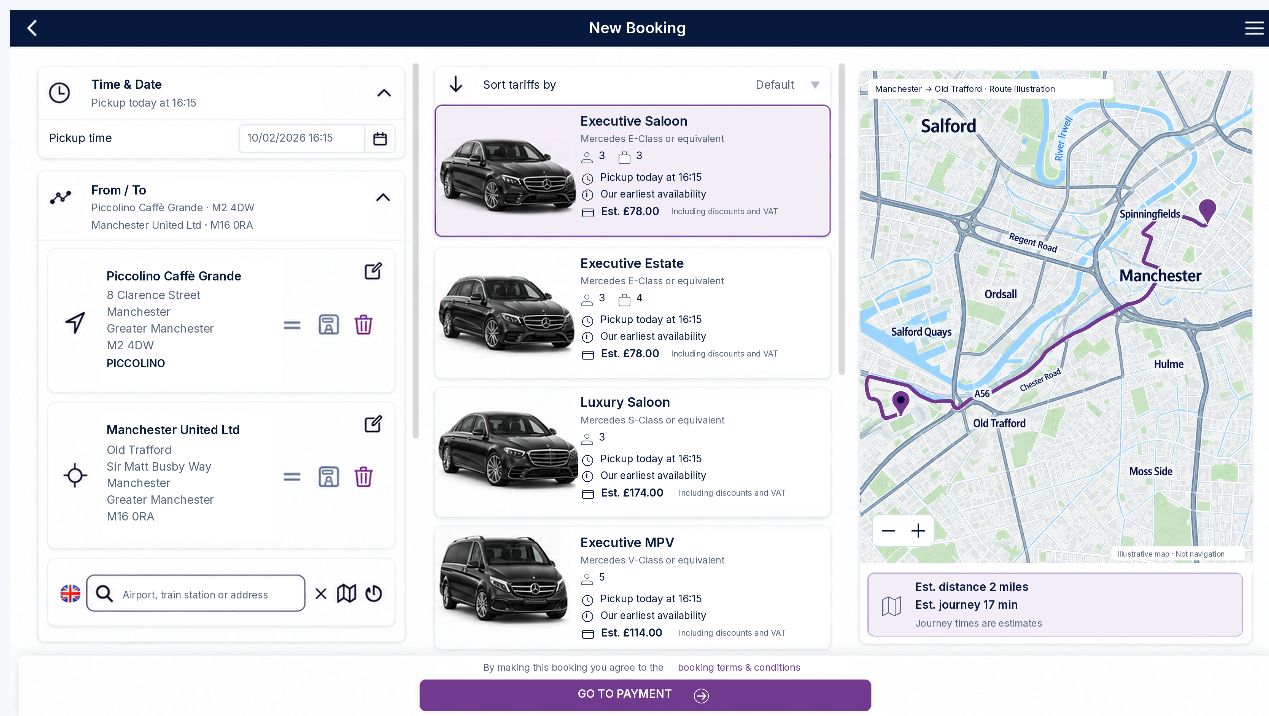

Account and private clients book using your tariffs and availability.

Your commercial rules

Manage tariffs, account settings and vehicle choices.

Your brand

Give clients a consistent booking experience.

Live operational visibility

Waiting work, jobs in progress, driver activity and exceptions in one operational view.

The screenshot displays the FREEDOMX Operations Control Centre interface. The top navigation bar includes 'Main', 'Maintenance', 'Accounting', and 'Web'. Below this, there are tabs for 'Layout', 'View Manager', and 'Live Operations'. The main content area is divided into three sections:

- Jobs Waiting:** A table listing 10 jobs with columns for Minutes, Job, Account, Tariff, Journey, Driver, Vehicle, Est. price, and Status text. The status text includes 'Awaiting Driver', 'Agent assigned', and 'Awaiting Driver'.
- Jobs in Progress:** A table listing 10 jobs with columns for Minutes, Job, Account, Tariff, Journey, Driver, Vehicle, Est. price, and Status text. The status text includes 'Arrived', 'On Route', and 'Job Accepted'.
- Ops Driver Messages:** A table listing 5 messages with columns for Created, User, Destination, Callsign, Message, and Response. The messages include driver assignments, passenger readiness, traffic updates, and job assignments.

On the right side of the interface is a map of London showing various locations and routes. The map includes labels for Luton, St Albans, Harlow, Chelmsford, Watford, Brentwood, Romford, Dartford, Sevenoaks, Redhill, Guildford, Kingston upon Thames, Croydon, Hounslow, and London. The map also shows major roads like the M25 and M20.

Clear priorities

Waiting work and exceptions remain visible.

Automated workflow

Configured rules progress routine statuses and tasks.

Context to allocate work and intervene quickly.

Illustrative interface and map with synthetic demo data.

Your branded passenger app

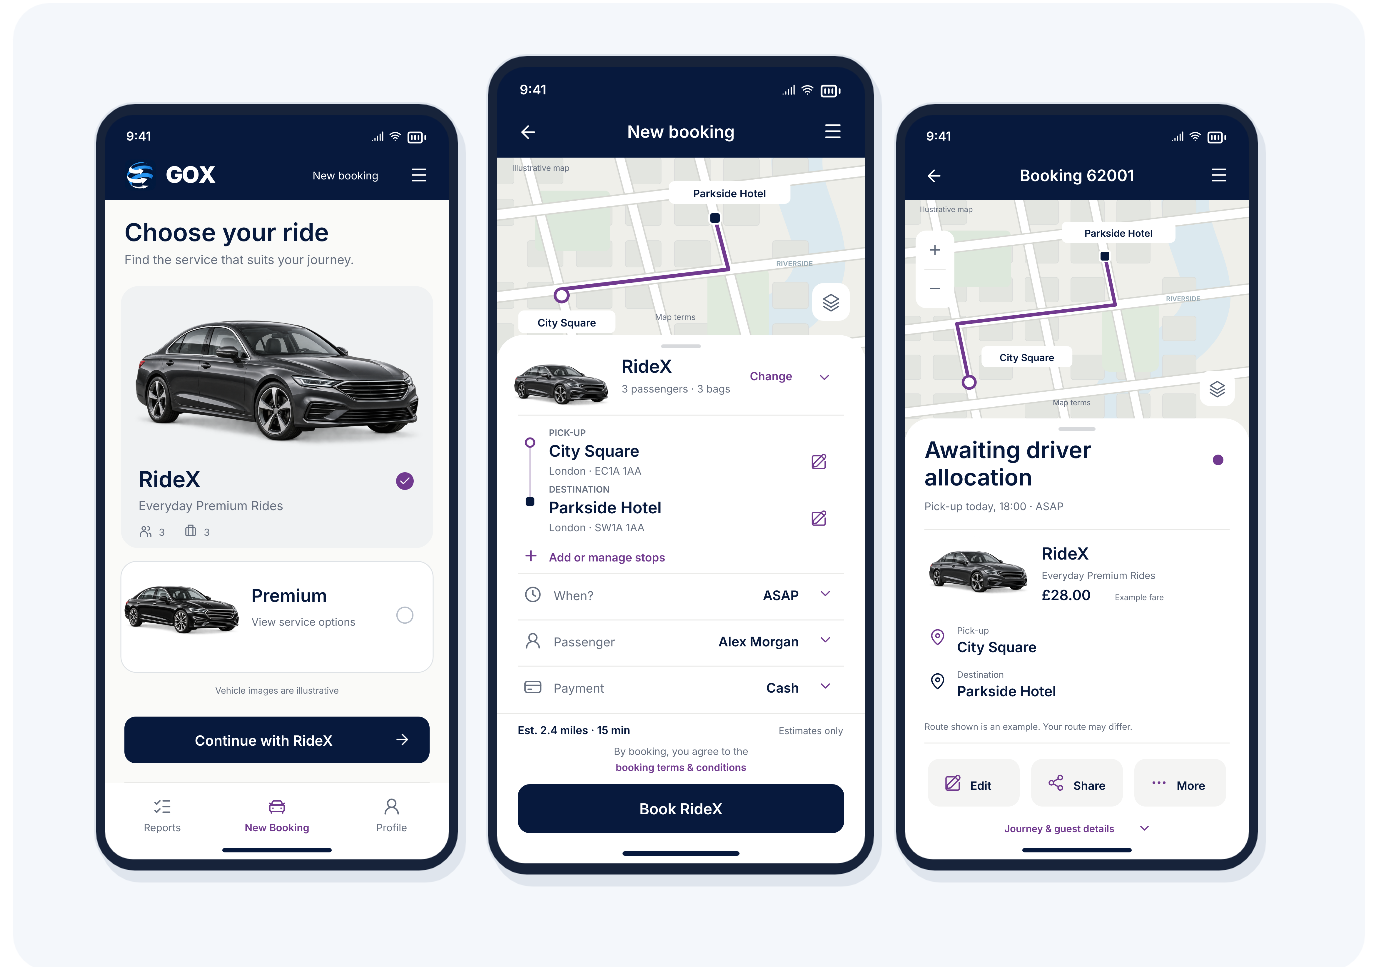

Your customer app for chauffeur and private-hire services.

Passenger booking

Present your services and booking information to passengers.

Booking at a glance

Ride choices, booking details and status information.

Driver information and flexible capacity

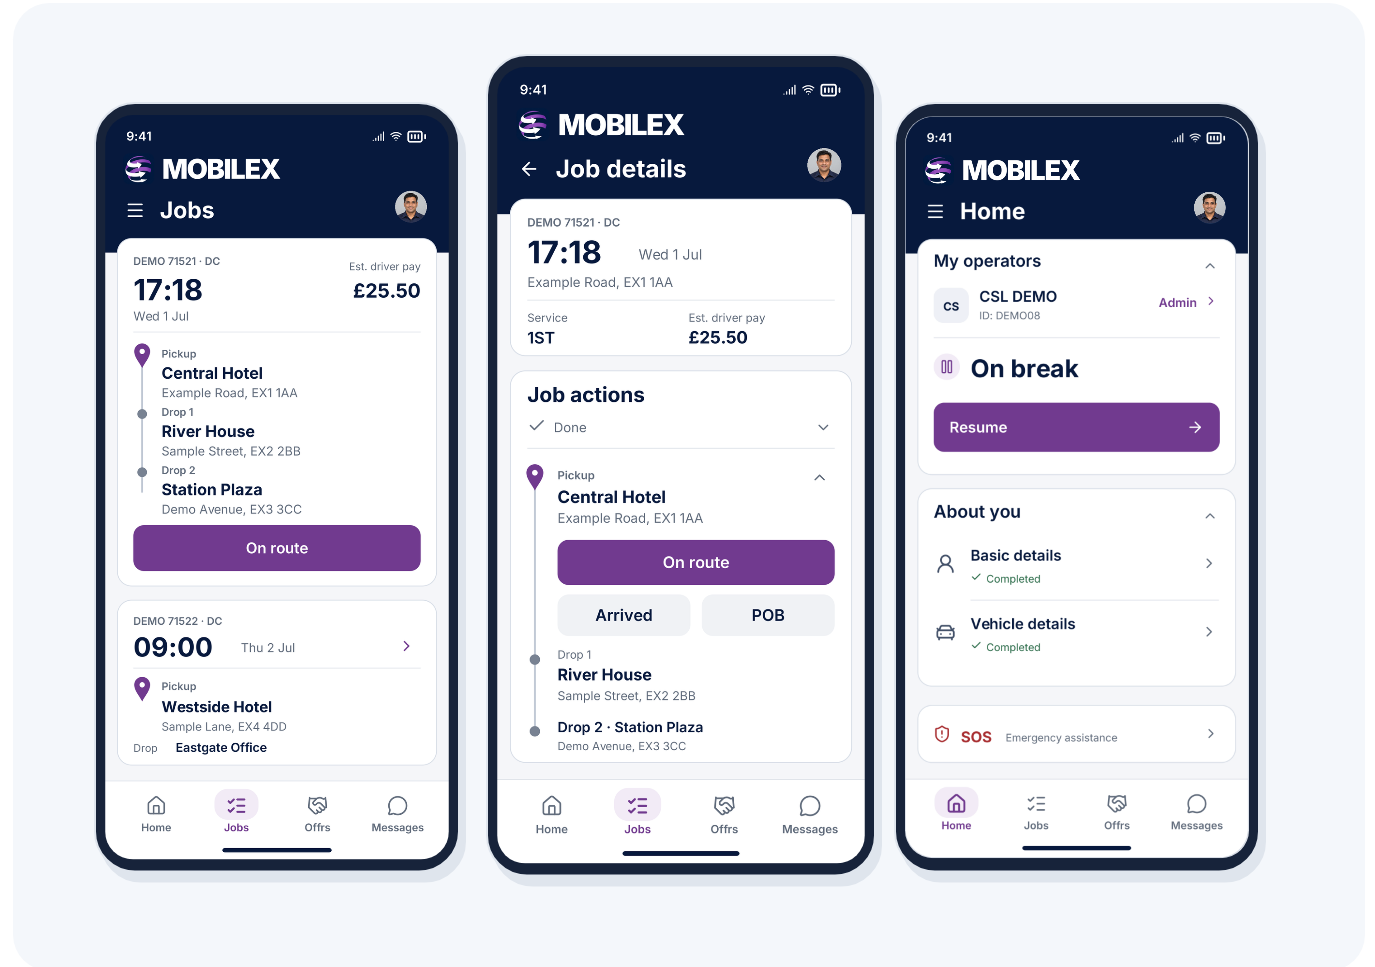

Job details and status actions in the driver's app.

The driver workspace

Jobs, job details and the home workspace in MobileX.

OffrX within MobileX

Offer work to selected drivers or partners, with operational control.

FREEDOMX

FREEDOMCONNEX API

Connected platforms and services

Connect FreedomX to
booking networks and
operational services.

Integration scope reflects
your requirements.

SAMSARA

orkestro

Your operation. Connected.

A 20-minute walkthrough focused on your bookings, dispatch and driver workflows.
